Date: March 16, 2020

Dear valued Customers:

In response to the developing health concerns in Colorado and abroad, we are increasing our cleaning and sanitizing procedures at our Denver office.

We realize we are frequently in contact with those who are elderly and/or have compromised immune systems. For this reason, we understand that the developing situation should not be taken lightly.

We will continue to have our sales office and showroom professionally cleaned on a regular basis. Additionally we are increasing to daily wipe downs of touchable surfaces such as: touch screens, door handles, desktops and entryways. We will also have hand sanitizer on hand in our showroom for immediate use. Finally we do offer a complete sales process online and are extending our offer of in-home demonstration to qualified customers within 50 miles of our dealership should you wish to not visit our store in-person.

Our entire team prides ourselves on a clean and healthy work environment. We are taking these precautions to make sure we all stay healthy for ourselves and most importantly, for those around us.

We are open for business and we thank you for trusting us over the years. We look forward to seeing you soon.

Respectfully submitted,

**Justin McMinn**

**General Manager**
